of the future*

7 November 2009

PROCEEDINGS OF THE ROYAL SOCIETY

Editor-in-Chief
Professor Michael P. Hassell
Reviews Editor
Professor Michael T. Siva-Jothy
Publishing Editor
Victoria Millen

Editors:
Professor Elizabeth Adkins-Regan
Professor Nigel Bennett
Professor Innes Cuthill
Professor Hans Heesterbeek

Editorial Board

M. P. Hassell, Editor-in-Chief, Department of Life Sciences, Imperial College London

E. Adkins-Regan, Editor, Department of Psychology, Cornell University

N. C. Bennett, Editor, Department of Zoology and Entomology, University of Pretoria

I. C. Cuthill, Editor, School of Biological Sciences, University of Bristol

J. A. P. Heesterbeek, Editor, Department of Farm Animal Health, University of Utrecht

M. T. Siva-Jothy, Reviews Editor, Department of Animal & Plant Sciences, University of Sheffield

F. W. Allendorf, Division of Biological Sciences, University of Montana

S. H. Alonzo, Department of Ecology and Evolutionary Biology, Yale University

A. T. D. Bennett, School of Life and Environmental Sciences, Deakin University

M. W. Blows, Evolutionary Quantitative Genetics Group, University of Queensland

M. Bonsall, Department of Zoology, University of Oxford

R. Boyd, Department of Anthropology, University of California, Los Angeles

P. M. Brakefield, Institute of Biology, Leiden University

R. Bshary, Institute of Zoology, University of Neuchâtel

N. Burgess, Institute of Cognitive Neuroscience and Department of Anatomy, University College London

G. R. Carvalho, School of Biological Sciences, University of Wales, Bangor

M. Chapuisat, Department of Ecology and Evolution, University of Lausanne

M. Chase, Jodrell Laboratory, Royal Botanic Gardens, Kew

S. L. Chown, Department of Botany and Zoology, University of Stellenbosch

R. L. Cifelli, Department of Zoology and School of Geology and Geophysics, University of Oklahoma

A. S. Clare, Marine Science and Technology, University of Newcastle upon Tyne

N. S. Clayton, Department of Experimental Psychology, University of Cambridge

T. S. Collett, Sussex Centre for Neuroscience, University of Sussex

D. P. Costa, Center for Ocean Health University of California, Santa Cruz

G. Cowlshaw, Institute of Zoology, University of Cambridge

M. S. Dawkins, Department of Zoology, University of Oxford

T. Day, Departments of Mathematics & Biology, Queen's University

L. De Meester, Laboratory of Aquatic Ecology, Katholieke Universiteit Leuven

C. G. Faulkes, School of Biological Sciences, Queen Mary, University of London

N. R. Franks, School of Biological Sciences, University of Bristol

T. Fukatsu, National Institute of Advanced Industrial Science and Technology (AIST), Japan

R. D. Gray, Psychology Department, University of Auckland

L. D. Harder, Department of Biological Sciences, University of Calgary

R. G. Harrison, Department of Ecology and Evolutionary Biology, Cornell University

S. Healy, School of Psychology, University of St Andrews

J. A. Hutchings, Department of Biology, Life Science Centre, Dalhousie University

M. Kirkpatrick, College of Natural Sciences, University of Texas at Austin

J. C. Koella, Faculty of Life Sciences, Imperial College London

C. M. Lessells, Department of Animal Population Biology, Netherlands Institute of Ecology

B. R. Levin, Department of Biology, Emory University

S. P. Long, Department of Plant Biology, University of Illinois

I. J. Lovette, Cornell Laboratory of Ornithology, Cornell University

B. S. Low, School of Natural Resources and Environment, University of Michigan

P. Lundberg, Department of Theoretical Ecology, Lund University

A. E. Minetti, Institute of Human Physiology I, University of Milan

B. D. Neff, Department of Biology, University of Western Ontario

M. Noor, Biology Department, Duke University

T. Pizzari, Department of Zoology, University of Oxford

T. D. Price, Department of Ecology and Evolution, The University of Chicago

D. Promislow, Department of Genetics, University of Georgia

A. Purvis, Faculty of Natural Sciences, Biology Division, Imperial College London

L. Råberg, Department of Animal Ecology, Lund University

J. Radwan, Institute of Environmental Sciences, Jagiellonian University

M. Rees, Department of Animal and Plant Sciences, University of Sheffield

J. G. Robson, College of Optometry, University of Houston

L. Rowe, Department of Ecology & Evolutionary Biology, University of Toronto

H. D. Rundle, Department of Biology, University of Ottawa

L. W. Simmons, Centre for Evolutionary Biology, University of Western Australia

B. Sinervo, Department of Ecology and Evolutionary Biology, University of California

A. Smith, Department of Molecular Palaeontology, The Natural History Museum, London

H. Tsukaya, Graduate School of Science, University of Tokyo

J. L. van Leeuwen, Experimental Zoology Group, Wageningen University

M. Wikelski, Department of Ecology and Evolutionary Biology, Princeton University

J. T. Wootton, Department of Ecology & Evolution, The University of Chicago

Xing Xu, Institute of Vertebrate Paleontology and Paleoanthropology, Beijing

Da-yong Zhang, Beijing Normal University

GUIDANCE FOR AUTHORS

Selection criteria

The criteria for selection are scientific excellence, originality and interest across disciplines within biology. The Editors are responsible for all editorial decisions and they make these decisions based on the reports received from the referees and/or Editorial Board members.

Many more good manuscripts are submitted to us than we have space to print, and we give preference to those that present significant advances of broad interest. Submission of preliminary reports, of articles that merely confirm previous findings, and of articles that are likely to interest only small groups of specialists, is not encouraged. All articles are sent to Editorial Board members for an initial assessment of their suitability, and may be returned to authors without in-depth peer review if this assessment makes it seem unlikely that they will be accepted.

Publishing format

Proc. R. Soc. B articles are published regularly online and in print issues twice a month. Along with all Royal Society journals, we are committed to archiving and providing perpetual access. Although papers are limited to ten journal pages in length (with a per-page charge for articles exceeding six pages), there is the facility for including Electronic Supplementary Material (ESM). Contents of the ESM might include details of methods, derivations of equations, large tables of data, DNA sequences and computer programs.

However, the printed version must include enough detail to satisfy most non-specialist readers. Supplementary data up to 10Mb is placed on the Society's website free of charge. Larger datasets must be deposited in recognised public domain databases by the author.

Conditions of publication

Articles must not have been published previously, nor be under consideration for publication elsewhere. The main findings of the article should not have been reported in the mass media. Like many journals, *Proc. R. Soc. B* employs a strict embargo policy where the reporting of a scientific article by the media is embargoed until a specific time. The Editor-in-Chief has final authority in all matters relating to publication.

Electronic Submission details

The Royal Society's electronic-submission and peer-review service provides *Proc. R. Soc. B* authors with the facility to submit their papers online. The service allows you to upload files in a reliable and user-friendly way, using a Web-based system. When your paper is received, an immediate acknowledgement is sent that details how you can track your contribution online.

For full submission guidelines and access to all journal content please visit the *Proc. R. Soc. B* website, for further details see rspsb.royalsocietypublishing.org.

The Royal Society is an independent scientific academy founded in 1660 and self-governing under Royal Charter. The Society has three roles, as the scientific academy of the United Kingdom, as a learned society, and as a funding body.

Objectives of the Royal Society are to

- recognise excellence in science
- support leading-edge scientific research and its applications
- stimulate international interaction
- further the role of science, engineering and technology in society
- promote the public's understanding of science
- provide independent authoritative advice on matters relating to science, engineering and technology
- encourage research into the history of science

For further information on the Society's activities, please contact the following departments on the extensions listed by dialling +44 (0)20 7839 5561, or visit the Society's Web site (royalsociety.org).

Research Support (UK grants and fellowships)

Research appointments: 2547
Research grants: 2539
Conference grants: 2540

Science Advice

General enquiries: 2585

Science Communication

General enquiries: 2572

International Exchanges (for grants enabling research visits between the UK and most other countries (except the USA))

SUBSCRIPTIONS

In 2010 *Proc. R. Soc. B* (ISSN 0962-8452) will be published twice a month. Full details on how to subscribe can be obtained either by contacting our journal fulfilment agent, Portland Customer Services, Commerce Way, Colchester CO2 8HP. Tel: +44 (0)1206 796351; fax: +44 (0)1206 799331; email: sales@portland-services.com or by visiting our website at royalsocietypublishing.org/info/subscriptions. The Royal Society is a Registered Charity No. 207043.

Typeset in India by Techset Composition Limited, Salisbury, UK. Printed by Latimer Trend, Plymouth.

This paper meets the requirements of ISO 9706:1994(E) and ANSI/NISO Z39.48-1992 (Permanence of Paper) effective with volume 247, issue 1318, 1992.

Proceedings of the Royal Society B (ISSN 0962-8452) is published twice a month for \$2128 per year by the Royal Society, and is distributed in the USA by Pitney Bowes International Mailing Services Inc. as mailing agent. Periodicals postage paid at Kearny, NJ, and additional mailing offices. POSTMASTER: Send address changes to PB International Mailing Services Inc. 500 US Hwy 46, Clifton, NJ, 07011.

Subscription prices 2010 calendar year	Europe	USA & Canada	All other countries
Printed version plus electronic access	£1106/€1437	US\$2128	£1231/US\$2207

Cover image: The Black-chinned Hummingbird (*Archilochus alexandri*), which has the smallest genome size reported to date for birds. This is one of 37 species of hummingbirds studied by Gregory *et al.* (pp. 3753–3757), revealing strong constraints on genome size in these birds with hovering flight and extreme metabolic rates. Photo by Luis Mazariegos.
